## FOREWORD

Nursery and floriculture crop production and sales have been on an upward trend for many years. South Carolina's population moved over the 4 million mark on the 2000 Census and this has resulted in increasing demand for ornamental plants and sod. Cash receipts for nursery, greenhouse, and floriculture crops in 2000 totaled \$255.9 million, an increase of 28 percent from 1999 and a 42 percent increase from 1998. The National Agricultural Statistics Service released the first multi-State nursery production survey results in August, 2001. The survey was conducted in 17 States and measured production of nine categories of nursery products. Our cover for this year's publication is a recognition of the extremely important contribution this industry makes to the economy of our State.

This bulletin is a cooperative effort among the National Agricultural Statistics Service of the United States Department of Agriculture, and the Department of Agricultural and Applied Economics, the South Carolina Agricultural Experiment Station, and the Cooperative Extension Service of Clemson University. This cooperative relationship increases the amount of information available about agriculture. The Federal program provides comparable statistics for all states, which are released in national reports, while state funds make it possible to prepare and publish detailed statistics for South Carolina.

We sincerely appreciate the time given by South Carolina farmers and agri-industry personnel to report information concerning their operations. Accurate agricultural statistics are crucial to an orderly marketplace and we thank everyone who assists in this effort. Finally, appreciation goes to my entire staff for their efforts in preparing accurate and timely statistics for South Carolina agriculture and for their dedication in preparing this publication.

Sincerely,

Robert A. Graham  
State Statistician

# SOUTH CAROLINA CROP SUMMARY

## 2001

**JANUARY:** Overall, the month's average temperature Statewide was 44 degrees, near normal. The range for the month was 13 degrees for the low and 76 degrees for the high, and total rain fall was 1.85 inches. As the new year rang in, winter came in strong with daily temperatures dipping into the teens. Around the State, ice was observed on ponds and lakes, and temperatures for the first week of the new year were ten degrees below normal. Rains came during the second week with amounts of 0.25 - 0.50 inch. Milder weather produced normal temperatures for this period. During the third week, several areas in the State set daily record highs with temperatures in the high 70's, approximately 6 degrees above normal. As January came to an end, temperatures were only 2 degrees below normal for the last week. During the month, farmers were busy repairing and maintaining equipment, caring for livestock, attending agricultural expos and seminars and preparing for taxes with year end record keeping.

**FEBRUARY:** The State's average temperature for February was 50 degrees Fahrenheit, 3 degrees above normal. The average precipitation for the month was approximately 2.30 inches which is about 1.67 inches below normal. Farmers were busy repairing and maintaining equipment, pruning fruit trees, caring for livestock, attending agricultural seminars, preparing records for year end totals and taxes.

**MARCH:** Average temperatures during March were below normal across the State. Low 30 degree temperatures during the early morning hours of the 27<sup>th</sup> and 28<sup>th</sup> created problems for the peach farmers, especially with the early blooming varieties. Soil moisture was aided by a series of storms passing through during the month, but at month's end, total precipitation for the year was still several inches below normal. Farmers were beginning spring planting with some early corn, melon and vegetable planting already underway in the lower part of the State.

**APRIL:** Moisture was adequate during the month aided by scattered thunder showers. Statewide average rainfall was 0.7 inch. The temperature range for the month was from the 30's to the 90's; temperatures were slightly below normal with warm days and cool nights. A scattered mid-month frost caused minimal damage to tender cantaloup and watermelon plants. Strawberry picking was in full swing and at month's end, farmers were actively planting cotton, peanuts, sorghum, soybeans, tobacco and vegetables. Corn planting was nearly complete and small grain development was ahead of normal. Soil moisture was rated at 8% very short, 52% short, and 40% adequate at the end of month.

**MAY:** The Statewide average temperature was 69 degrees for the month of May, and total average rainfall for the month was 0.9 inch. High temperatures and lack of moisture had farmers concerned about crops and livestock and stalled most planting activities. Planted fields were showing little growth, corn was wilting, and fruits and vegetables were declining without irrigation. Strawberry harvest continued, and the peach crop was beginning to be harvested. At the end of May the soil moisture was rated at 33% very short, 46% short, and 21% adequate Statewide. Planting of most field crops was behind normal due to dry soils; small grain harvesting was underway.

**JUNE:** Rain fall for the month averaged 4.7 inches Statewide. With frequent rainfall in the afternoons, corn, soybeans, cotton, peanuts, and tobacco were all in good condition. Statewide average high temperatures were in the high 80's and the lows in the lower 60's with an average temperature of 77. Peaches remained in fair to good condition. Harvesting of cantaloups, cucumbers, peaches, snap beans, tomatoes, and watermelons were close to 2000 harvest rates. Livestock and pastures were in good condition. Soil moisture ratings across the state improved slightly to 1% very short, 17% short, 75% adequate, and 7% surplus.

**JULY:** The month started with a few scattered showers in the State and the end of the month brought strong thunderstorms along with high winds and hail in some areas. Generally, temperatures were slightly above normal, with some daytime temperatures lingering in the low 90's; high humidity increased the heat index significantly. The average temperature across the State was 79 degrees. Peach condition was fair to good for the month. Corn harvest was just starting, while the cantaloupe, watermelon, snap beans, and tomato harvests were very close to completion. Soil moisture ratings improved to 1% very short, 13% short, 73% adequate, and 13% surplus for the month.

**AUGUST:** Evening thunderstorms the first part of the month provided the soil with much needed moisture. Temperatures remained about normal with some days creeping into the upper 90's and lower 100's. The Statewide average temperature was 80 degrees. Corn harvest was behind normal, but exceptional yields were reported. Cotton remained in fair to good condition at month's end, with the lack of rain causing smaller plants and slow development. Tobacco harvest continued near normal and by the month's end was 79% complete, 1 percent ahead of normal. By month's end the peach harvest was 90% complete, 5% behind the 2000 crop year, with conditions fair to good. Early month rains improved pasture and livestock conditions, but end of month hot temperatures and few scattered rains, caused conditions to worsen. Hay harvest continued and was 88% complete at month's end. Soil moisture was rated at 16% very short, 48% short, and 36% adequate.

**SEPTEMBER:** The Statewide average temperature was 71 degrees, with the temperatures ranging from the high 40's to the mid 80's; the average rainfall was 2.8 inches. Corn harvest was 94% complete, 3% ahead of 2000 with high yields being reported across the State. By the end of the month farmers had begun spraying defoliants on cotton and had harvested about 15% of the crop with condition fair to good. Tobacco harvest was 99% complete. Peach harvest was completed the first of the month and 69% of the apple crop was harvested by month's end with fair to good condition reported. Pasture and livestock conditions improved by month's end and planting of small grains was ahead of normal. Soil moisture ratings across the State were 2% very short, 35% short, 61% adequate, and 2% surplus.

**OCTOBER:** The average Statewide temperature was 61 degrees with a range from the high 30's to the mid 70's. The first frost of the year occurred in the last week of October. The remainder of the month temperatures were near normal. Precipitation was almost nonexistent the entire month leading to concerns of continued drought conditions. The Statewide average rainfall was 0.8 inch. Continued dry weather provided favorable conditions for fall harvest. By month's end, corn and tobacco harvest was complete. The apple harvest was 97% complete and peanut harvest was 90% complete, both well ahead of 2000 and the normal. Sorghum harvest was also ahead of normal, but cotton and soybean harvest was behind normal. Planting of small grains slowed and in some areas stopped due to drought conditions. Pasture and livestock conditions continued to worsen from the lack of rain. Soil moisture ratings were 26% very short, 60% short, 14% adequate.

**NOVEMBER:** The Statewide average temperature was 57 degrees with a range from the low 30's to the low 70's, the cool dry weather was excellent for harvesting. Sweetpotato and apple harvesting was completed by mid-month. Sorghum harvesting ended the month at 100% complete, with cotton trailing closely at 94% complete. At the month's end soybeans were 92% harvested, 16% ahead of 2000 and 18% ahead of normal. Small grain planting was behind at the beginning of the month due to lack of soil moisture, but by month's end planting had increased to near normal. Pasture and livestock conditions continued fair to good but farmers had to supplement cattle feeding with hay due to lack of pasture growth. Soil moisture was rated at 45% very short, 50% short, and 5% adequate.

**DECEMBER:** Temperatures ranged from above normal during the first part of the month to below normal the last half. Statewide precipitation was drier than normal for the month and the only measurable rainfall occurred around mid-month which averaged above 1.0 inch in some places. Small grain growth during the month was rapid due to warmer than normal temperatures. Farmers were hoping for cooler weather to restrict growth. Harvesting of cotton and soybeans was completed during the first half of the month, and pecan harvesting was completed by the end of the month. Pastures and livestock were in fair condition with some supplemental feeding.

## CROPS, FRUITS AND VEGETABLES

<sup>1/</sup> Minor vegetable commodities for fresh market and processing added to the Federal Estimating Program in the Year 2000.

**MUSHROOMS:** South Carolina participates in the Annual Mushroom Survey, however due to established agency guidelines, data are included in other states.

## GRAIN STORAGE CAPACITY Off-Farm and On Farm

Capacity of **Off-Farm** commercial grain storage totaled 24.2 million bushels in SOUTH CAROLINA on December 1, 2001, 1 percent below December 1, 2000. With this capacity, South Carolina ranks 33<sup>rd</sup> in the United States.

Off-farm grain storage facilities in South Carolina totaled 87 on December 1, 2001, unchanged from December 1, 2000. **On-Farm** capacity is not published for South Carolina.

### Off-Farm and On-Farm Grain Storage Capacity, Selected States, December 1, 2000 and 2001

# **NURSERY, FLORICULTURE, HORTICULTURE AND TURFGRASS**

## **NURSERY CROPS**

(NOTE: Survey now conducted every two years; next survey: Spring 2003.)

Growers of nursery crops and flowers in South Carolina registered \$255.9 million in cash receipts in 2000, an increase of 28 percent from 1999 and a 42 percent increase from 1998. The website address for a detailed report concerning this survey is:

<http://usda.mannlib.cornell.edu/reports/nassr/other/nursery/index.html>

## **FLORICULTURE**

Total crop value of all floriculture crops at wholesale for South Carolina growers with \$10,000 or more in sales is estimated at \$90.3 million for 2001, compared with \$85.9 million for 2000. There were 105 growers in 2001 compared with 117 in 2000. Total covered area for floriculture crop production was recorded at 6.61 million square feet, up from the 6.28 million square feet in 2000. Total greenhouse space covered area with 4.85 million square feet, was down from 2000's 5.04 million square feet. Growers with \$100,000 plus in total sales posted a wholesale value of plant production during 2001 of \$78.4 million. The wholesale value of bedding and garden plants totaled \$69.3 million, compared with \$62.4 in 2000. The website address for a detailed report concerning this survey is:

<http://usda.mannlib.cornell.edu/reports/nassr/other/zfc-bb/index.html>

Excludes lime. 3/ Totals may not add due to rounding.

## FARM NUMBERS AND LAND IN FARMS

The number of farms in SOUTH CAROLINA in 2001 is estimated at 24,000, unchanged from 2000. Land in farms in 2001 is estimated at 4.80 million acres, unchanged from 2000 but down 1 percent from 1999.

The number of farms in the UNITED STATES in 2001 is estimated at 2.16 million, down 0.7 percent from 2000. The decline in farms and ranches occurred primarily in agricultural operations with sales in the \$10,000-\$99,999 economic class. The second largest decline since the 1.4 percent drop in 1991. Total land in farms, at 941.2 million acres, declined 0.2 percent or 1.9 million acres from last year. The average size of farm increased 2 acres from 434 in 2000 to 436 acres in 2001.

A **farm** is defined as "any establishment from which \$1,000 or more of agricultural products were sold or normally would be sold during the year." Government payments are included in sales. Institutional farms, experimental and research farms, and Indian Reservations are included as farms. Places with their entire acreage enrolled in the Conservation Reserve Program, set aside, or other government programs are

considered operating farms if they receive \$1,000 or more in payments. Operations with 5 or more horses or ponies and no other agricultural sales also counted as farms. Operations with fewer than 5 equine and at least \$1,000 in agricultural sales qualified as farms.

**Land in farms** is all land operated by farms during the year. It includes crop and livestock acreage, wasteland, woodland, pasture, land in summer fallow, idle cropland, and land enrolled in the Conservation Reserve Program and other set aside or commodity acreage programs. It excludes all public, industrial, and grazing association land. It excludes all land operated by establishments not qualifying as farms.

**Revision Policy:** Farm numbers information is subject to revision the following year and following review of the five-year Census of Agriculture. The 1997 Census of Agriculture for South Carolina counted 20,189 farms. The "coverage total" number of farms was 5,612 resulting in an adjusted Census total of farms of 25,802 with a relative standard error of 3.7 percent. The "coverage total" is defined as the net difference between undercounted and overcounted farms.

**Number of Farms and Land in Farms: Economic Sales Class, SOUTH CAROLINA, 1999 - 2001 <sup>1/</sup>**

Year	Number of Farms		Land in Farms		Number of Farms		Land in Farms	
	\$1,000 - \$9,999		\$10,000 - \$99,999		\$100,000 & Over		Total	
	Number	Thou. Acres	Number	Thou. Acres	Number	Thou. Acres	Number	Thou. Acres
1999	18,700	2,550	4,000	1,150	2,300	1,150	25,000	4,850
2000	17,700	2,500	4,000	1,200	2,300	1,100	24,000	4,800
2001	17,700	2,500	4,100	1,200	2,200	1,100	24,000	4,800

<sup>1/</sup> Based on the gross value of sales, which includes sales of agricultural products such as crops, livestock, horses, honey, furs, fish, nursery and greenhouse products, rabbits, etc. Government program payments from the previous year are also included.

**Number of Farms, Land in Farms, and Average Size, SOUTH CAROLINA and NATION, 1999 - 2001 <sup>1/</sup>**

Year	South Carolina			United States		
	Number of Farms	Land in Farms	Average Size of Farm	Number of Farms	Land in Farms	Average Size of Farm
	- Thousand -	- Thou. Acres -	- Acres -	- Thousand -	- Thou. Acres -	- Acres -
1999	25.0	4,850	194	2,192	947,440	432

# LIVESTOCK INVENTORY

## ALL CATTLE AND CALVES

The South Carolina cattle industry had a total of 430,000 cattle and calves as of January 1, 2002 with 11,000 cattle farms. There was a total of 210,000 beef cows while a decade ago 232,000 beef cows were on 13,000 farms.

The 2001 calf crop totaled 185,000 head, down 5 percent from 2000 and down 7 percent from 1999. The calving rate for these years was 79.6 percent for 2001 and 79.2 percent for 2000.

South Carolina ranks 38<sup>th</sup> in the Nation for all cattle and calves, with Texas ranking 1<sup>st</sup>, Kansas ranks 2<sup>nd</sup>, Nebraska ranks 3<sup>d</sup> and California ranks 4<sup>h</sup>. The leading county in South Carolina was Anderson followed by Saluda, Laurens, Newberry, and Spartanburg.

There were 4,000 cattle and calves on feed in South Carolina January 1, 2002, unchanged from 2001 but down 2,000 from 1999.

## MILK PRODUCTION

There were an estimated 240 farms with one or more dairy cows in South Carolina during 2001 with an average 21,000 milk cows which produced 367 million pounds of milk. In 2000, the State had 250 farms with an average of 23,000 milk cows that produced 370 million pounds of milk. A decade ago in 1991, there were an estimated 800 farms with an average 33,000 milk cows that produced 405 million pounds of milk. South Carolina ranks 39<sup>th</sup> in the Nation for average milk cows, California ranks 1<sup>st</sup>, Wisconsin 2<sup>nd</sup> and New York 3<sup>rd</sup>. Newberry is the leading county with 4,600 milk cows, followed by Orangeburg, Spartanburg, and Saluda.

The 2001 milk production was 1percent below 2000 and 1999. The annual average milk per cow at 17,476 pounds compares with 16,087 pounds in 2000 and 15,375 pounds in 1999. Farm value of milk produced, which includes value of fluid milk and cream consumed in farm households, milk used for farm-churned butter, milk fed to calves, as well as marketings of milk and cream totaled \$60,555,000 in 2001 compared with \$52,170,000 in 2000, and \$60,147,000 in 1999. The average price of milk in 2001 was \$16.50 per cwt. compared with \$14.10 in 2000, and \$16.30 in 1999.

1/ Milk production per cow includes all milk produced (excluding milk sucked by calves) divided by all milk cows (including milk cows used only for subsistence and milk cows that are dry).

## MANUFACTURED DAIRY PRODUCTS

No South Carolina data was published for Manufactured Dairy Products, which includes Blue Cheese, Ice Cream Mix, Lowfat Ice Cream Mix, Sherbet Mix, and Frozen Yogurt Mix for the years 2000 and 2001. There were 4 plants in operation during the year 2001 unchanged from 2000. State data is not published when fewer than 3 plants report a commodity or if individual plant operations could be disclosed.

# LIVESTOCK INVENTORY

## HOGS AND PIGS

SOUTH CAROLINA had an estimated swine population of 320,000 on December 1, 2001, up 30,000 from the previous year. This level ranks South Carolina 21<sup>st</sup> in the Nation.

The number of operations with hogs (an operation is any place having one or more hogs and pigs on hand anytime during the year) at 700 during 2001, was unchanged from 2000 and 1999.

2001	30	290	320	75	70	65	80

## EGG PRODUCTION

SOUTH CAROLINA egg production in 2001 totaled 1.42 billion eggs from an average 5,585,000 layers. This is 14 percent above the 1.25 billion eggs produced in 2000 and 17 percent above the 1.22 produced in 1999.

The average number of layers on hand during 2001 was 5,585,000, up 12 percent from the 4,974,000 on hand in 2000 and 14 percent above 1999's 4,908,000 layers. The annual average rate of lay per layer

(including breeders) was 254 eggs in 2001 and 250 in 2000, and 248 in 1999.

South Carolina ranked 17<sup>th</sup> in the nation for egg production in 2001 with Iowa 1<sup>st</sup>, Georgia 6<sup>th</sup>, and North Carolina 11<sup>th</sup>. Within the State, Newberry County ranked 1<sup>st</sup> followed by Kershaw, Darlington, Saluda, and Lexington counties.

## BROILERS RAISED

SOUTH CAROLINA broiler producers raised 198,000,000 broilers in 2001. This is 1 percent more than 2000 and 4 percent more than 1999. Pounds produced totaled 1,049,400,000 in 2001, up 5 percent from 2000. The average price received for broilers in 2001 was 39.0 cents per pound liveweight equivalent, up 6.0 cents from 2000, and up 2.0 cents from 1999. Value of production, which includes home consumption, was \$409,266,000, up 24 percent from

2000's \$331,221,000 and 20 percent above 1999's \$341,880,000.

On a county wide basis during 2001, Lexington, Aiken, Oconee, Clarendon, and Sumter, were the leading broiler-producing counties in the State. South Carolina ranks 13<sup>th</sup> in the Nation with Georgia holding the top and Arkansas placing 2<sup>nd</sup>, Alabama 3<sup>d</sup>, Mississippi 4<sup>th</sup>, and North Carolina 5<sup>th</sup>.

## CATFISH PRODUCTION

SOUTH CAROLINA catfish growers had an estimated 520 surface acres of water in commercial operations on January 1, 2002, down from January 1, 2001 and 2000. The value of sales of all foodsize catfish (large, medium and small categories) on commercial operations during 2001 totaled \$893,000, up 18 percent from the \$755,000 in 2000. This level ranks South

Carolina 11<sup>th</sup> in terms of foodsize catfish sales while Mississippi is in 1<sup>st</sup> place, Alabama 2<sup>nd</sup>, Arkansas 3<sup>d</sup>, and Louisiana 4<sup>th</sup>. The average price per pound for all foodsize catfish in 2001 was \$0.62 compared with \$0.77 in 2000. The number of commercial catfish operations on January 1, 2002 was estimated at 15, up 1 operation from 2001, but down 4 from 2000.

# SOUTH CAROLINA CASH RECEIPTS

Preliminary cash receipts from farm marketings in South Carolina during 2001, including government payments, totaled \$1,794,033,000. The \$1.8 billion is 7 percent (\$112 million) above 2000 and 15 percent (\$240 million) above 1999. Government payments for 2001 were 10 percent below 2000, but 2 percent above 1999. The number one commodity in terms of cash receipts during 2001 was broilers, accounting for 25 percent of the total, excluding government payments.

CROPS cash receipts, at \$781 million, accounted for 47 percent of the total commodity cash receipts during 2001 compared with 48 percent in 2000 and 46 percent in 1999. Preliminary 2001 crops cash receipts increased \$37 million from 2000 and were \$129 million above 1999. Greenhouse, nursery & floriculture, tobacco and cotton were the top three crop commodities in 2001 in terms of cash receipts.

LIVESTOCK AND LIVESTOCK PRODUCTS, with cash receipts of \$882 million in 2001, accounting for 53 percent of the commodity total, increased 11 percent from 2000 and were 14 percent above 1999. Broilers, cattle and calves, and turkeys were the top three commodities.

<sup>1/</sup> Value of agricultural sector production output is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production. Net farm income is the farm operators' share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development. <sup>2/</sup> A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. SOURCE: Economic Research Service - USDA.
